

TWO VETOES IN SENATE

SENATE—FIFTY-SIXTH DAY.

The fact that the income of the Territory has been spent, by promise, almost twice over did not deter the Senate from overriding the Governor's veto of the burial-of-the-chiefs bill. This appropriates the sum of twenty thousand dollars for the erection of a mausoleum in which will be placed the remains of the monarchs and chiefs of old Hawaii. Senator Smith was the sexton who undertook the disinterment of the bill after the veto had been read and carried the affair through successfully.

Another bill among the crumbs swept from the table was that relating to permission for the County of Maui to go into debt. This was taken up after being tabled and passed. It may encourage the emissary from Hilo who is supposed to be on his way here for the purpose of getting a similar bill through for the Island of Hawaii. President Bishop stated unofficially yesterday that he had been asked by wireless two days ago if there would be any use for Hawaii to try and he wired back negative encouragement. The Senator from the vicinity of the Mausoleum opposes anything like unwarranted debt.

The bill to provide for the distribution of the net profits of the Industrial School and Lahainaluna met defeat in the Senate by the amendment offered by Senator Dowsett. It changed the aspect so greatly that Senator Hayselden concluded that it would be better to take what they could get under the present bill than to fly to things they were not quite sure of. The principal objection advanced by the Senators yesterday during the debate was to having the money distributed by one individual instead of passing through the regular governmental channel.

A rather important bill lost was that which prohibits the use of firearms for hunting purposes within three miles of the postoffice. There are a lot of aliens who shoot in the rice patches by the side of men who know how to use guns and the result is not always pleasant to the people who reside in the neighborhood of the rice patches. They complain that it is not safe for them to walk around their yards or to sit on their verandas on Sunday on account of the falling shot. This argument was advanced yesterday but the bill was too heavily weighted to move it from the table.

House Bill No. 238, relating to the manufacture of electric light and power on Maui, passed first reading.

House Bill No. 235, providing a sinking fund for the redemption of County bonds, passed first reading.

MORE VETOES.

The Governor returned yesterday Bill No. 106, relating to the burial of chiefs and appropriating \$20,000, for the same.

Senator Smith asked that the bill

THE BRIGHT SIDE

of life. It is a feeling common to the majority of us that we do not get quite the amount of happiness we are entitled to. Among the countless things which tend to make us more or less miserable ill health takes first place. Hannah More said that sin was generally to be attributed to biliousness. No doubt a crippled liver with the resulting impure blood, is the cause of more mental gloom than any other single thing. And who can reckon up the fearful aggregate of pain, loss and fear arising from the many diseases which are familiar to mankind; like a vast cloud it hangs over a multitude no one can number. You can see these people everywhere. For them life can scarcely be said to have any "bright side" at all. Hence the eagerness with which they search for relief and cure. Remedies like

WAMPOLE'S PREPARATION have not attained their high position in the confidence of the people by bald assertions and boasting advertisements. They are obliged to win it by doing actually what is claimed for them. That this remedy deserves its reputation is conceded. It is palatable as honey and contains the nutritive and curative properties of Pure Cod Liver Oil, combined with the Compound Syrup of Hypophosphites, Extracts of Malt and Wild Cherry. Nothing has such a record of success in Scrofula, Influenza, Throat and Lung Troubles, and emaciating complaints and disorders that tend to undermine the foundations of strength and vigor. Its use helps to show life's brighter side. Professor Reddy, of Canada, says: "I have much pleasure in stating that I have used it in cases of debility and found it to be a very valuable remedy as well as pleasing to take." You cannot be disappointed in it. Sold by chemists.

be reconsidered. He said the line of Hawaiian chiefs is almost extinct and it was but proper that the remains of those already gone be fittingly preserved. The years pass quickly and the population changes. There are many Hawaiians of this generation who are not acquainted with the subject. The full amount recommended may not be required but he wanted the bill passed.

Senator Chillingworth, who had opposed the measure in his report to the Senate, took a similar view when the bill came back yesterday. He believed it was a subject that could wait a couple of years. Senator Smith opposed this. Senator Bishop said the mausoleum was put in good condition two years ago and there was no occasion for further expense at this time. No one knows but what persons who have looked after the remains of some of the monarchs up to this time may come forward at a future session of the Legislature and ask to be reimbursed. The bill passed over the veto in spite of these arguments.

The message vetoing the bill to repair the banks of the Waimea river was read and action deferred until Monday.

The report of joint conference committee on House Bill No. 11 was adopted.

Consideration of the veto of House Bill No. 147 was deferred until Monday. Veto of House Bill No. 139 was taken up and the veto sustained for the reason that a substitute measure is to be introduced. Consideration of veto of House Bill No. 34 was deferred until the 29th inst.

THE LOAN BILL.

Senate Bill No. 62, appropriating \$132,000 for the completion of the Nuanu dam was called for consideration.

Senator Smith wanted to know what had been done with the other items. Unless they are going into some other bill it would be unwise to pass over the items for harbor improvements here.

Senator Chillingworth asked that consideration of the bill be deferred until 2 p. m. Carried.

PROFIT SHARING.

Senate Bill No. 116, relating to distribution of profits, was called for third reading and met its objection from Senator Knudsen who opposed handing over the money to one man for distribution. In time all of the wharf receipts would go to the Superintendent of Public Works for distribution. So long as there is a treasurer and an auditor the distribution of the funds should be through their offices.

Senator Dowsett offered an amendment which failed to meet with the approval of Senator Hayselden and Senator Smith. For that reason Hayselden moved to indefinitely postpone, he thought the schools would have a better show under the present law. He withdrew this motion, however, when Senator Knudsen moved to table, a motion which carried.

Senator Chillingworth moved to take from the table, House Bill No. 184, relative to shooting with firearms within three miles of a postoffice. The motion was lost.

House Bill No. 119, relating to tolls, was called and read for the third time as amended on Senator Bishop's motion and passed.

House Bill No. 193, relating to permits to treat lepers, passed third reading.

House Bill No. 197, relating to the extermination of the mongoose, was read for the third time. Senator Makekau asked that the bill be amended to read "25 cents for the head of each mongoose" instead of ten cents. It looked doubtful for a time whether the motion would receive a second but Senator Dowsett came to the aid of the mover and he gave his reasons: The heads of the deceased mongoose had to be preserved and that would be an expense. He wanted to kill the bill, anyhow. His amendment failed. Senator Brown moved to table. Motion lost. Motion to pass on second reading was lost.

House Bill No. 223, limiting the time in which suits may be brought, passed third reading.

House Bill No. 229, relating to bonds for public officers, passed third reading.

House Bill No. 230, relating to certificates of acknowledgment, passed third reading.

House Bill No. 217, relating to claims of persons who paid license fees to the Government, was referred to the Ways and Means committee for burial preparations.

House Bill No. 240, relating to hunting with firearms in counties, passed second reading.

OVERLAPPING OFFICES.

Senate Concurrent Resolution No. 8, relating to overlapping offices. Senator Smith spoke against the resolution in much the same strain as on the previous day. He said the changes should come gradually. Several have been made in the County Act at this session and others would follow.

Senator McCarthy agreed with the previous speaker but there are certain offices which may be dispensed with. There are Territorial offices which should be done away with and the only way to accomplish this is by making

amendments to the Organic Act.

Senator Smith said all the changes necessary could be made here without going to Congress for it. The motion to lay on the table, made by Smith, failed and the resolution was adopted on motion of Senator McCarthy.

Secretary Atkinson then notified the Senate of the Governor having signed the following bills:

House Bill No. 144, Act 99, "An Act to add three new sections to Chapter 135 of the Revised Laws of Hawaii, relating to garnishment, to be known as Sections 2115a, 2115b, and 2115c."

House Bill No. 205, Act 100, "An Act to protect the public on the public streets and other public grounds, from animals."

House Bill No. 207, Act 101, "An Act to protect the owners of bottles and siphons used in the manufacture and sale of soda waters, mineral or aerated waters, porter, ale, beer, cider, ginger ale, or other beverages."

House Bill No. 225, Act 103, "An Act to authorize the appointment of fiscal agents by the Treasurer of the Territory of Hawaii, adding a new section to the Revised Laws of Hawaii to be known as Section 1172a."

House Bill No. 226, Act 103, "An Act to amend Section 1177 of the Revised Laws of Hawaii relating to the Registrar of Public Accounts."

Senate Bill No. 87, Act 104, "An Act to provide for the protection of birds beneficial to the forests of the Territory of Hawaii, and to define the same."

Senate Bill No. 117, relating to the division of the license fees collected, was read for the second time. This is a substitute for the bill vetoed by the Governor on Thursday and passed. Senator Lane wanted it translated.

Senator Hayselden had his request granted for the revivification of the Maul bond bill and then moved that it pass on third reading. It seems that the Maul delegation received a joint wireless message that it would be to the tall timber for them if the bill did not pass. The bill passed.

Senator Hayselden asked that the Education committee return Senate bill No. 109 and then moved that it be tabled. Carried.

Afternoon Session.

Superintendent Holloway appeared before the Senate in the committee of the whole and made the statement that the adoption of the Schuyler report would mean great good to the Territory. Following this he made a confession that the receipts from the sale of water were so large that they should not be lost sight of. This was startling in view of the fact that the report that the "waterworks was too great an expense to be passed over to the counties" emanated from his office. He explained each item in the bill to appropriate \$900,000 and admitted that he was partly responsible for the introduction of the measure which is based on an honest conclusion, regardless of his residence on this island. When he went over the list of necessities for the Territory he decided these to be the most important. When the Federal Government appropriated it did so for such measures it believed the most important. In that way Hilo gets an appropriation for a breakwater on which Congress will spend a million dollars. Of the items in Section 2 of the bill, after the Kamuela item, the construction of the shed at wharf No. 2 was most important. The next in importance is the wharf along one side and across the end of Government wharf No. 1. Then came the reconstruction of the Government wharf at Hilo. Next in importance would be a retaining wall around wharf No. 3.

Relative to the dam in answer to a question Mr. Holloway said it was not possible for him to say whether the dam can be finished for \$132,000. Practically all of the hard work has been done. It was practically impossible for the contractor to have sluiced from the lower side.

Senator Bishop moved the insertion of the following item: Shed for wharf No. 2, \$45,000. Senator Knudsen wanted to know if the Senate is in favor of the Territory going further into debt. Senator Smith said he believed it necessary. Senator Dowsett said the completion of the wharves is as important as the completion of the dam. The wharfage which now goes to private parties amounts to \$20,000 a year. He proposed to help Maui and Hawaii when the time comes.

Senator Coelho said Maui would support any measure tending toward revenue. For that reason her representatives would favor the adoption of the majority report submitted relative to the dam proposition.

Senator Bishop said to show a spirit of fairness he would move that the item of \$15,000 for the Hilo wharf be inserted.

Senator Dowsett moved to increase to \$20,000. Carried.

Senator Smith asked for the wharfage items for building a retaining wall around Government wharf No. 3, \$45,000, and dredging Kilauea slip, \$55,000.

Senator Bishop opposed. Mr. Holloway had said there is no immediate use for these.

Senator Kalama said it was rather a bitter pill to swallow but he believed it best to appropriate the money for both slips.

Senator Knudsen said the speeches of today are the duplicates of the utterances of the members two years ago when \$300,000 was appropriated for wharf improvements. Today they ask for almost as much more.

Senator Smith begged indulgence while he called the attention to the appropriation for Waimea river two years ago. The motion by Senator Smith for the two items was lost. It then referred to the \$900 for installation of oil burners at Kailhi and Kaimuki pumping stations and moved that they be inserted.

This motion was lost. The appropriations under this loan bill as passed are:

For completion Nuanu dam.....\$132,000
Extension water wks, Kamuela 1,500
Shed, Govt. Wharf No. 2.....45,000
Extension Hilo wharf system.....20,000

\$196,000
The committee rose and the chairman made the report as above with an amendment to Section 2 to the effect that any Government official who shall divert the excess of any appropriation or any part thereof, above cost of construction of such work, to any other

IMMIGRANTS ARRIVE AFTER MANY WEARY WEEKS AT SEA

SPANISH IMMIGRANT CHILDREN.

SOME OF THE HELIOPOLIS IMMIGRANTS.

HOW FAR THE REVENUE WILL LIKELY BE OVERRUN

If the Legislature pursues its financial course, of which the destination is near, to the end without slackening sail at the advice of the Executive, there will be little short of a quarter of a million dollars appropriated in excess of probable Territorial revenue. The following is a correct statement of the present situation, as of April 24. It includes some items disallowed by the Governor but which the Legislature may persist in retaining, but does not include several bills carrying appropriations still pending, nor allowance for next Legislature:

INCOME.		APPROPRIATIONS TO DATE.	
Present period 1905-7.		April 24, 1907.	
Estimated amount available for period ending June 30, 1907.....	\$1,713,900 44	Expenses Senate and House, Acts 2 and 3.....	50,000 00
Estimated disbursements for same period.....	1,533,116 56	Additional departmental use, Act 9.....	66,861 42
Surplus.....	180,783 88	Exp. Congressional visit.....	15,000 00
Coming period 1907-9.		Furnishing Hilo High School, Act 26.....	3,000 00
Estimated income 1907-9.....	\$5,158,500 00	Dept. Public Works and Bd. Ag. & For., add'l for immediate use, Act 91.....	5,757 60
County share as by law established.....	1,940,000 00	College of Agriculture, Act 94.....	75,000 00
Balance.....	\$3,218,500 00	Haw'n Agri. Exp. Station, Act 95.....	2,000 00
Add surplus June 30, 1907.....	180,783 84	Unpd' bills, previous periods	16,828 62
Total estimated available for both periods.....	\$3,399,283 84	Waimea River repairs, etc.,	12,000 00
To balance (present deficit).....	229,696 70	Protection of remains of dead kings.....	20,900 00
		Salary bill gone to conference at.....	1,712,140 00
		Current expense bill gone to conference at.....	1,720,395 00
		Total of appropriations passed and in conference.....	\$3,628,982 64

purpose, shall be guilty of embezzlement. The bill passed third reading.

CUTTING ROADS.

Senator Smith made a verbal report on the Governor's veto on the bill allowing the roads to be dug under certain conditions. The Senator recommended that the veto be sustained as the bill is defective. Senator Makekau wanted to be shown and Senator Smith obliged. Senator Makekau moved to pass the bill notwithstanding the veto of the Governor. The motion was lost and the veto was sustained.

THE MONGOOSE BILL.

Senator Dowsett moved to take from the table the Quinn mongoose bill. This carried and he introduced a new section prohibiting the breeding of mongoose which also carried and the bill passed third reading.

The Teachers' Pension bill was taken from the table on motion of Senator Smith and referred to the Judiciary committee.

House Bill No. 219, relating to deputy sheriffs acting as transient officers passed second reading.

Vote on Senate Bill No. 117 was reconsidered and Senator Makekau moved to amend so as to include one half of the costs in civil cases. The motion was lost. The bill passed on second reading.

RHEUMATIC PAINS RELIEVED.

No one need now suffer the agonizing pains of sciatic and acute rheumatism, as quick relief may be had by applying Chamberlain's Pain Balm. This fact has been clearly demonstrated in many thousands of cases. This liniment relieves the pain and makes sleep and rest possible, which is alone worth many times its cost. Many have been permanently cured of rheumatism by the use of this liniment. For sale by all dealers. Benson, Smith & Co., Ltd., agents for Hawaii.

The British S. S. Heliopolis will be shifted from the Channel wharf to Bishop's slip, today.

VAN DINE'S MISSION ATTRACTS ATTENTION

D. L. Van Dine, experiment station entomologist for the Hawaiian Islands, was a passenger on the steamer Korea, which arrived Friday, and left a few hours after landing for Washington, D. C., where he goes to confer with Dr. L. O. Howard, chief of the Bureau of Entomology of the Department of Agriculture, concerning several problems that have come up in the entomological affairs of the islands.

One of the most interesting of these is in regard to the honey produced on the islands. There is some substance there that the bees obtain that gives a very high percentage of glucose in the honey. The government pure-food law allows only a certain percentage of glucose, as that substance is one of the chief adulterants that is commonly used. While the island honey is pure and just as wholesome as that produced in any part of the world, this comparatively large amount of glucose shows badly in the analysis. The honey shipment of the islands will amount to over 800 tons, this year, and the producers are greatly interested in having the law so modified in their case as to allow the honey to come under the pure-food products.

Another problem that the entomologist has to contend with is a small fly, that in some parts of the islands is almost driving out the cattle industry. This fly has been abundant for a number of years, but it has only been of late that it has so seriously threatened the interests of the cattle men.

Van Dine will be in the United States for two months, and will then return to the islands.—San Francisco, Chronicle.

Heliopolis Brings Clean and Contented Lot of Spaniards.

The immigrant ship Heliopolis arrived off port at 2:30 p. m. yesterday and anchored outside. She brought 2287 Spanish immigrants from Malaga. The voyage took 47 days, which is considered very good time.

There are 500 children in the party, 300 of which are infants. On the voyage there were 19 deaths and 13 births. Three who died were women and the rest young children.

As soon as the Heliopolis anchored, the quarantine and immigration officials, customs officers, Secretary Atkinson and Walter Dillingham went out to her. Dillingham took charge of the steamer in the capacity of executive officer of the Territorial Board of Immigration.

The regular quarantine inspection found all well with the exception of seven cases of measles and two of mumps. The ailing are all babies.

Dr. Mackall and two nurses were taken out to the steamer and the sick folks and their families were taken to Quarantine Island.

The Heliopolis will dock at 7 a. m. today at the Immigration wharf and those aboard will then undergo the examination of the immigration inspectors.

Three stowaways beat their way to Hawaii.

The steamer is in excellent condition and those who saw the S. S. Suveric say that there is no comparison between the condition of the two vessels and the passengers thereon.

The Spaniards are an exceptionally fine-looking lot of people and appear to be clean and good-natured. While naturally anxious to get ashore they took their enforced detention in good part, doubtless coming to the conclusion that after 47 days away from terra firma, a day or so more didn't matter.

It is expected that all the immigrants and their baggage will be clear of the steamer by this afternoon.

Secretary Atkinson had the following to say of the visitors last night: "The people are as clean as a looking lot as I have ever seen."

"Though the ship is not in the cleanest possible condition, it is not any worse than might have been expected after so long a voyage with so many people on board."

"They have had no trouble whatever on the way out. You may have heard talk about Spaniards and knives, in connection with the immigration of these people, but there was never a knife shown by anyone during the whole passage."

"There were twelve births and nineteen deaths on the voyage. An outbreak of measles occurred."

"Walter F. Dillingham has full charge in taking care of the immigrants when they are landed. None but the sick will be landed tonight."

JAPANESE MIGRATION DIFFICULT PROBLEM

WASHINGTON, April 13.—Under the regulation governing the entrance into this country of Japanese laborers, there is no way of preventing the Japanese from Honolulu transshipping at San Francisco for British Columbia.

It is evident from inquiries that have been made by officials of this Government that the Japanese, to whom the Japanese Government issues passports to Mexico or to the Hawaiian Islands, have no intention of remaining there. Their destination, as the laborers themselves have admitted on cross-examination, is the United States. Recently several hundred Japanese laborers were interrogated in Mexico as to their intentions. Every one of them said he expected sooner or later to reach this country. Some of them were in serious financial straits. They were awaiting an opportunity to get across the border into this country. The same is true of Japanese who are going to British Columbia. There is no work for them down there, and they expect to get into the United States as soon as possible.

Commissioner Sargent of the Bureau of Immigration declines to discuss the subject, but it is known that Secretary Straus of the Department of Commerce and Labor is keeping in close touch with the situation. He, too, is reticent. Trouble is being experienced in handling the question, however, particularly in relation to the Japanese immigrants who are arriving in Mexico. It is practically impossible to prevent them from being smuggled across the border, and the Government has no means of identifying them after they reach this country. The question is likely to become more serious in the near future.

FORMER KINAU STEWART DEAD

Basilio L. Guerrero, for a number of years chief steward of the steamer Kinau, died at the residence of his daughter, Mrs. Mary Gilbert, Waikiki, yesterday morning after a lingering illness. The funeral will be held today at 2 p. m., from the Harrison Mutual Burial Association parlors. Interment at Kailhi.

Many people who traveled in the Hilo packet in former years will remember Steward Guerrero kindly. He leaves a wife, daughter and adopted daughter, also a son, Miguel, a compositor on the Advertiser.

The ship Dirigo, Captain Goodwin, sailed for Honolulu on April 19 from San Francisco.
